

# FORTRESS

- In test after test conducted around the world, no anchor has set faster or has matched the holding power of FORTRESS.
- FORTRESS anchors are precision-machined from a high-tensile aluminum alloy, and are stronger and lighter than competitive steel anchors.
- FORTRESS models FX-37, FX-55, FX-85 and FX-125 are certified by Det Norske Veritas (DNV) as Super High Holding Power (SHHP) models.
- FORTRESS anchors have Certificate of Design from the American Bureau of Shipping (ABS).
- Sizes for boats up to 150 feet (46 meters).
- Lifetime Parts Replacement Warranty.
- Adjustable fluke angle for soft mud.
- Disassembles for easy storage.
- 90 day money back guarantee.
- Rust proof and non-magnetic.
- Tough anodized finish.
- No welds to fail.

# Guardian Anchors

- Guardian Anchors are manufactured from the same hardened Aluminum-Magnesium Alloy as FORTRESS, making them stronger and lighter than competitive steel anchors.
- Guardian Anchors are engineered for fast setting and strong holding power.
- Guardian Anchors use slightly smaller extrusion profiles than FORTRESS. Also, several FORTRESS precision machining steps and extra features, such as anodizing and adjustable fluke angles, are eliminated.

The result is a very affordable alternative to heavy steel anchors.

- Sizes for boats up to 72 feet (22 meters).
- One Year Parts Replacement Warranty.
- Disassembles for easy storage.
- 90 day money back guarantee.
- Rust proof and non-magnetic.
- No welds to fail.
